

Transit Oriented Project, FCT-Abuja, NIGERIA

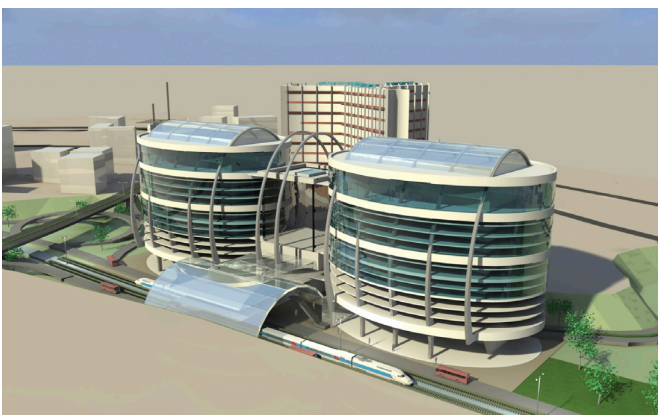

August, 2009

Private Commission

[Studio-CVC, Nigeria]

The project seeks to recuperate 'lost' spaces within the green belt of the Central Business District of FCT-Abuja, and along the designated light rail transit corridor. It uses the Station #15 at the border of three different districts (Central Business District, Maitama District, and Wuse-2 District) to create mixed-use spaces and an interconnected public space continuum along the light rail corridor. The project provides incentives to support a public-private partnership for infrastructure provisions in the city.
